NON-GAAP FINANCIAL MEASURES

The company supplements its consolidated financial statements presented on a GAAP basis with this non-GAAP financial information to provide investors with greater insight, increase transparency and allow for a more comprehensive understanding of the information used by management in its financial and operational decision-making. The non-GAAP financial measures disclosed by the company should not be considered a substitute for, or superior to, financial measures prepared in accordance with GAAP, and the financial results prepared in accordance with GAAP and reconciliations from these results should be carefully evaluated. In addition, the non-GAAP financial measures included in this press release do not have standard meanings and may vary from similarly titled non-GAAP financial measures used by other companies.

The company believes that organic net sales growth, non-GAAP adjusted segment EBITDA, adjusted net earnings and adjusted diluted per share measures are useful as supplements to its GAAP results of operations to evaluate certain aspects of its operations and financial performance, and its management team primarily focuses on non-GAAP items in evaluating performance for business planning purposes. The company also believes that these measures assist it with comparing its performance between various reporting periods on a consistent basis, as these measures remove from operating results the impact of items that, in its opinion, do not reflect its core operating performance including, for example, intangibles amortization expense, impairment charges, restructuring expenses, and other charges which management considers to be outside core operating results.

The company believes that free cash flow is an important measure of operating performance because it provides management and investors a measure of cash generated from operations that is available for mandatory payment obligations and investment opportunities, such as funding acquisitions, repaying debt and repurchasing our common stock.

The company believes that its presentation of these non-GAAP financial measures is useful because it provides investors and securities analysts with the same information that Middleby uses internally for purposes of assessing its core operating performance.
