ELGIN, Ill.--(BUSINESS WIRE)--August 3, 2023--The Middleby Corporation (NASDAQ: MIDD), a leading worldwide manufacturer of equipment for the commercial foodservice, food processing, and residential kitchen industries, today reported net earnings for the second quarter of 2023.

"We delivered solid results with top line growth and margin expansion at our Commercial Foodservice and Food Processing segments. We continue to execute toward our long-term growth and profitability targets at our Residential business, while managing the near-term headwinds from challenging housing market conditions. Inventory de-stocking affected the quarter at both our Commercial and Residential businesses and is expected to continue into the second half, with a lessening impact in the later part of the year. We continue to see strong underlying demand and a robust pipeline of new opportunities with our Commercial Foodservice and Food Processing customers adopting our latest innovations. Early signs of improvement in certain Residential categories are emerging as market conditions begin to stabilize and we are well-positioned for growth with the many exciting new products across our brand portfolio as the market returns," said Tim FitzGerald, CEO of The Middleby Corporation.

"Blue Sparq significantly enhances our software development capabilities and provides us with controls manufacturing as we accelerate our digital product strategy. We are excited with the many customer opportunities across our brand portfolio that Blue Sparq has immediately engaged, accelerating our pace of innovation and launch to market. The Filtration Automation patented oil filtration systems provide for significant reduction in operating costs and improved food quality. This oil filtration system complements our existing frying equipment offering and enables us to bring to market an industry leading integrated customer solution." Mr. FitzGerald continued, "We are pleased to have also completed the acquisition of Trade-Wind, a leader in the design of custom ventilation for the residential market. #### NON-GAAP FINANCIAL MEASURES

The company supplements its consolidated financial statements presented on a GAAP basis with this non-GAAP financial information to provide investors with greater insight, increase transparency and allow for a more comprehensive understanding of the information used by management in its financial and operational decision-making. The non-GAAP financial measures disclosed by the company should not be considered a substitute for, or superior to, financial measures prepared in accordance with GAAP, and the financial results prepared in accordance with GAAP and reconciliations from these results should be carefully evaluated. In addition, the non-GAAP financial measures included in this press release do not have standard meanings and may vary from similarly titled non-GAAP financial measures used by other companies.

The company believes that organic net sales growth, non-GAAP adjusted segment EBITDA, adjusted net earnings and adjusted diluted per share measures are useful as supplements to its GAAP results of operations to evaluate certain aspects of its operations and financial performance, and its management team primarily focuses on non-GAAP items in evaluating performance for business planning purposes. The company also believes that these measures assist it with comparing its performance between various reporting periods on a consistent basis, as these measures remove from operating results the impact of items that, in its opinion, do not reflect its core operating performance including, for example, intangibles amortization expense, impairment charges, restructuring expenses, and other charges which management considers to be outside core operating results.

The company believes that free cash flow is an important measure of operating performance because it provides management and investors a measure of cash generated from operations that is available for mandatory payment obligations and investment opportunities, such as funding acquisitions, repaying debt and repurchasing our common stock.

The company believes that its presentation of these non-GAAP financial measures is useful because it provides investors and securities analysts with the same information that Middleby uses internally for purposes of assessing its core operating performance.
